MY WAVE

THE ORIGINAL

Flair®

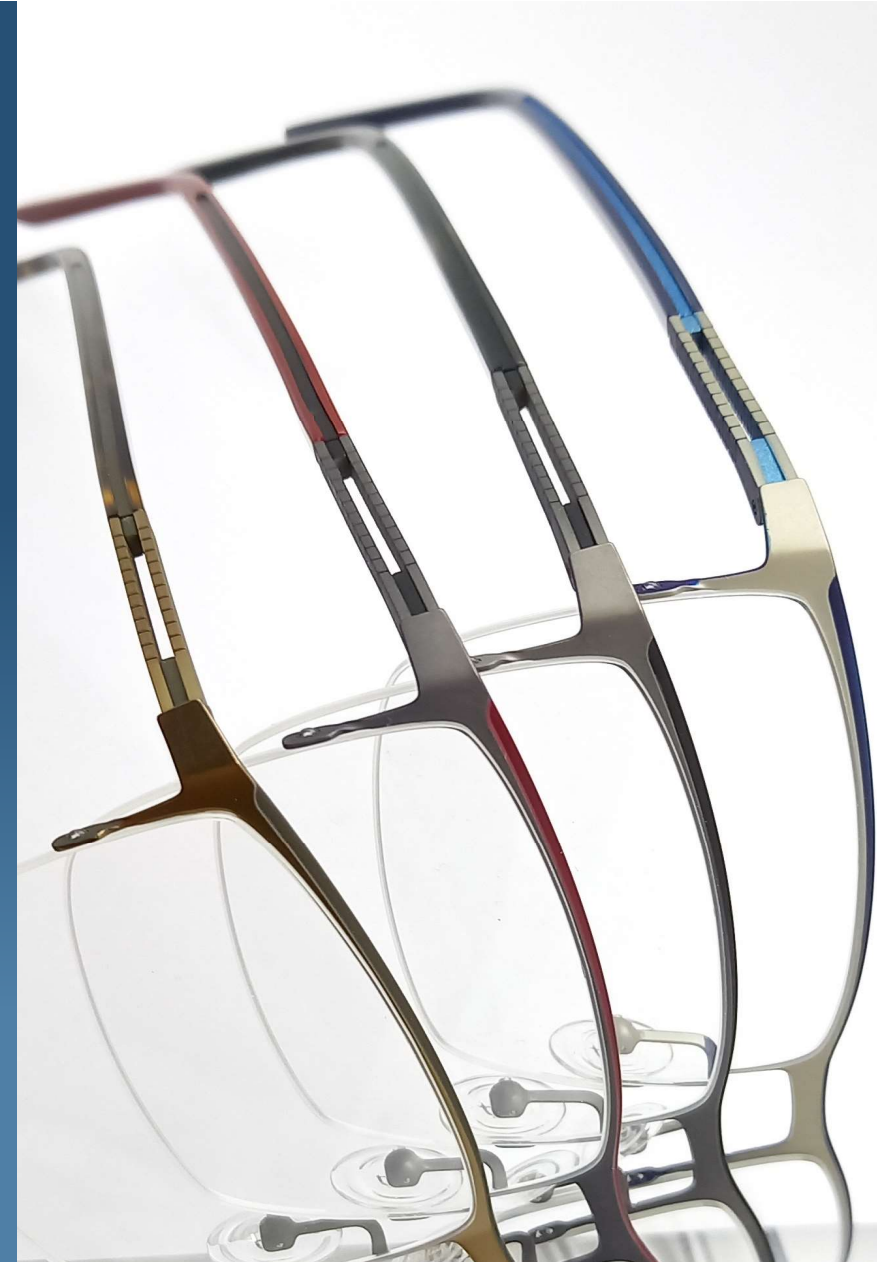

MYWAVE. 4002. THE ADDITION.

The famous temple, doubled My-Wave element with Acetate temple tips and a variety of colours, will be used for the Nylon frame. The glasing for this model is easier than the one for 2005/6, which is an advantage for the opticians.

This very light men model has very interesting details in the colours of the front, which are harmonized with the colour of the temples.

The colour design of the temples in Metal and Acetate and in contrasted colours is an important highlight for this frame, and respects Flair's leitmotiv:

„Beauty in every detail“.

ACETATE-TITANIUM 7008-7009. THE CONTINUATION.

The Brand comes again with Acetate material.

We continue with the acetate series and introduce a Modern-Retro style. The famous temple in Beta-Titanium comes with two new models.

A shape with Corner-Panto and a deep trapezoidal shape completes the offer.

ACETATE-TITANIUM. 7008. THE DETAILS.

7008

Deep trapezoidal shape.

The model is very trendy as a feminine frame with its deep shape of the lenses. The dark colour (col. 200) can also fit for men with a small face.

ART COUTURE. 9120. THE ELABORATE ONE.

9120

This frame convinces with its elaborate and modern decor of the temple.

Opened and closed elements are combined and will be imbued by a 3-dimensional wire element. The elements of the temple are painted by hand, and will be underlined by effect and texture of the lacquer.

PURE RIMLESS

THE ORIGINAL
Flair

PURE RIMLESS. 5040-5042. THE IDEA.

With these 3 models a new segment in our portfolio is appearing.

The task was: how can we hide the hinge? Thanks to an elaborated construction of the temples.

The temple is doubled by folding, our core skill in stainless steel.

We can find again the idea of 3 dimensions with the twisted temple, without adding more weight to the frame.

We also created space for a decent decor on flat temples. This space creates an interesting colour effect.

Beauty in every detail – typical FLAIR!

TITANIUM

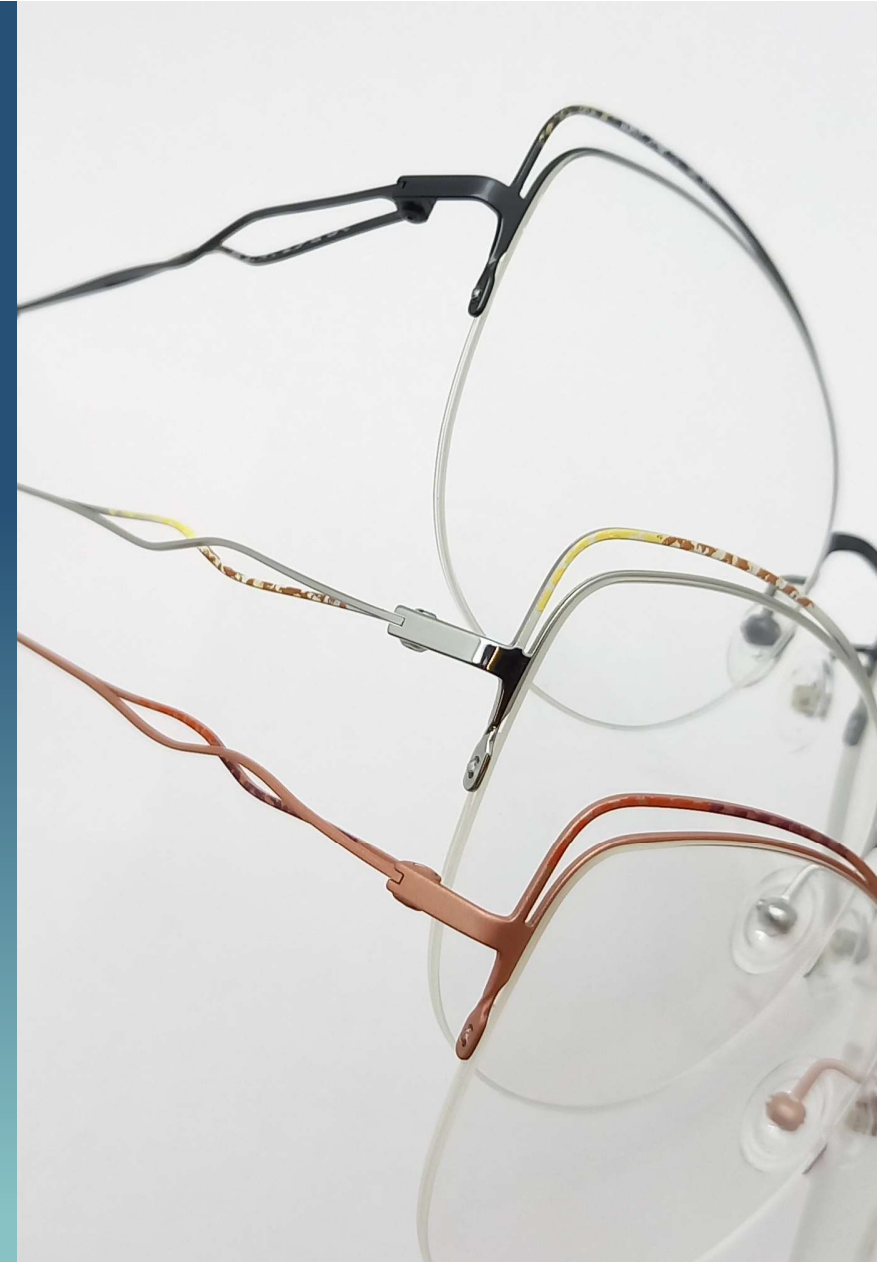

THE ORIGINAL
Flair

SWING - TITANIUM 4003 - 2008. THE IDEA.

The main idea of this frame is to create a 3-dimensionality, to show that this object is emotion from every sight.

The two frames are in titanium! Really slim, also with the bridge for a maximum of lightness and flexibility.

The painting by hand for the temple and front is another highlight of this frame, just known as „Beauty in every detail“.
